

CT – Line/Area Chart

Insights:

- **July** recorded the **highest number of orders (1935)**, representing the yearly peak.
- **February** had the **lowest orders (1685)**, showing the weakest monthly performance.
- The overall trend shows **frequent fluctuations**, with alternating rises and drops across months rather than a steady progression.
- A noticeable surge occurs from **June (1773) to July (1935)**, followed by a steep fall in **August (1841 → 1661 in September)**.
- **November** shows a rebound (**1792**) after the yearly low in **September** and **October**.
- **December** finishes at **1680**, slightly above February but still among the year's lowest values.

Steps to Reproduce :

1. Select "Line and area chart" from Build Visuals.
2. Add data fields:
 - Pass Month to the X-axis.
 - Pass Total Orders (Sum) to the Y-axis.

3. Format Your Visual → X-axis Options:
 - Change font style.
 - Change font size.
 - Change font color.
 - Turn Values ON.
 - Turn Title ON → adjust font style, size, and color.
4. Format Your Visual → Y-axis Options:
 - Adjust Range if required.
 - Turn Values ON → change font style, size, and color.
 - Turn Title ON → customize font color, size, style.
5. Go to Gridlines:
 - Turn Horizontal gridlines OFF (to match the cleaner layout).
6. Go to Lines (or Data Colors depending on tool):
 - Select the line color (e.g., orange).
 - Adjust area fill color and transparency.
7. Go to Border:
 - Turn Border ON.
8. Turn ON Data Labels:
 - Choose Label Position (e.g., “Above” the data points).
9. Turn ON "Values" under Data Labels:
 - Modify font style, size, and color.
10. Format Visual → General → Title:
 - Turn Title ON.
 - Edit the title text (e.g., “Monthly Trends for Total Orders”).
 - Change font style, size, color, and alignment.
 - Save the visual.
