## CT – Donut Chart :

### Insights:

- **Paseo** leads in total profit, contributing **28.4%** of the total profit with **4.8M**.
- **VTT** follows with **3.03M (17.96%)** of the total profit.
- **Amarilla (13.65%)** generates **2.31M** profit.
- **Velo (12.52%)** generates **2.11M** profit.
- **Montana (10.81%)** generates **1.83M** profit.
- **Carretera** has the lowest contribution at **1.83M (10.81%)**.

### Steps to Reproduce

1. Select a Donut Chart
  - From the Build Visuals pane, choose the Donut Chart visualization.
2. Assign Data Fields
  - Drag Product to the Legend field.
  - Drag Sum of Profit to the Values field.
3. Format the Chart
  - Donut Radius: Adjust to get a proper balance between visual appeal and clarity of data labels.
  - Data Labels: Enable and adjust to show the percentage of total profit for each product.
  - Legend: Position and format the legend to make product names clear and easily readable.
4. Customize Colors
  - Assign distinct colors for each product for clear differentiation (e.g., blue for Paseo, purple for VTT, etc.).

## 5. Conditional Formatting

- Enable Conditional Formatting for color gradients based on the sum of profit. Higher profits can be shown with darker shades, while lower profits can use lighter shades.

## 6. Title and Formatting

- Turn on the chart title and format the text for consistency (size, font, alignment).
- Optionally, add a subtitle or description to explain what the chart depicts.

## 7. Finalize and Save

- Review the visual for readability and coherence.
- Save your final chart with all adjustments made.
