Sum of GDP per capita and Sum of Score by GDP per capita and Continent

Sum of Healthy life expectancy and Sum of Social support by Healthy life expectancy and Continent

Overall rank and Score

Insights:

Global Metrics Dashboard

- Sum of GDP per Capita and Score by Continent
- X-axis: GDP per capita
- Y-axis: Sum of Score
- South America is highlighted, showing moderate GDP per capita with relatively high scores.
- Europe and Asia cluster in higher GDP ranges, indicating stronger economies.
- Oceania shows fewer data points but aligns with high GDP and score values.

Healthy Life Expectancy and Social Support by Continent

- X-axis: Healthy life expectancy
- Y-axis: Sum of Social Support
- South America again stands out with balanced values in both metrics.
- Europe shows high healthy life expectancy and strong social support.
- Asia and Oceania display varied distributions, suggesting diverse health and support systems.

Overall Rank vs. Score

- X-axis: Overall Rank (0 to 200)

- Y-axis: Score (2 to 8)
- A clear downward trend: higher ranks (lower numbers) correlate with higher scores.
- Indicates that countries ranked better overall tend to have stronger well-being scores.

Generosity vs. Healthy Life Expectancy

- X-axis: Generosity (0 to 0.6)
- Y-axis: Healthy Life Expectancy (0 to 1.2)
- No strong correlation visible; data points are scattered.
- Suggests that generosity does not directly predict healthy life expectancy across countries.

Observations:

- The dashboard provides a multi-dimensional view of global well-being, combining economic, health, and social metrics.
- South America is consistently highlighted, indicating a focus or notable trend in that region.
- Europe leads in health and support metrics, while Asia shows economic strength.
- The Overall Rank vs. Score chart is the most linear, offering clear insight into global rankings.
