CT –Filled Map Chart

Insights:

- Europe shows one of the highest GDP per capita levels, with many countries shaded prominently, indicating strong economic performance.
- North America also records high GDP per capita, particularly in the United States and Canada, reflecting strong financial and industrial development.
- Oceania (mainly Australia and nearby countries) displays strong GDP per capita, indicating a well-developed economy.
- Asia shows mixed GDP levels, with developed regions showing higher prosperity while emerging regions show moderate values.
- Africa reflects comparatively lower GDP per capita across most countries, highlighting economic challenges and slower development.
- South America exhibits moderate GDP per capita values, with economic strength varying significantly between countries.

Steps to reproduce:

1. Select Map visual from the Build Visuals pane.
2. Assign fields:
 - Location → Country/Region

- Size → GDP per capita (Sum)
 - Legend → Continent
3. Configure Data Category:
 - Select the Country field
 - Go to Column Tools → Data Category → Country/Region
 4. Format the Map:
 - Go to Format your visual → Map settings
 - Select Map style (Road, Light, Dark, etc.)
 - Turn Zoom buttons ON (optional)
 5. Legend formatting:
 - Go to Legend
 - Turn Legend ON
 - Set font style, size, and color
 6. Data Colors:
 - Go to Data colors
 - Assign unique colors for each Continent
 - Adjust transparency or saturation if needed
 7. Tooltip Setup (optional):
 - Add Country, Continent, and GDP per capita fields under Tooltips
 8. Border:
 - Go to Borders
 - Turn Border ON
 9. Title Formatting:
 - Go to General → Title
 - Turn Title ON
 - Enter: **“Sum of GDP per capita by Country/Region and Continent”**
 - Adjust font color, style, size, and alignment
 10. Save the report
