Sum of INFO.Total Revenue by designation

**CT – Pie Chart**

**Insights:**

• **Analyst** contributes the highest total revenue at **4.89M (50.84%)**, making it the dominant designation in overall revenue share.

• **MIS** follows with **2.05M (21.33%)**, showing a moderate but significant contribution.

• **Software** generates **1.98M (20.6%)**, slightly lower than MIS but still a major part of total revenue.

• **Support** records the lowest revenue share at **0.7M (approximately 7%)**, indicating minimal contribution compared to other roles.

• Overall, the revenue distribution is heavily skewed toward Analysts, while Support plays a limited role, highlighting potential skill or workload imbalance across designations.

**Steps to reproduce:**

1. Select the Pie Chart visual from the Build Visuals pane.

2. Assign fields:

   • Drag Designation into the Legend field well.

   • Drag Total Revenue into the Values field well.

3. Go to Format your visual → Legend:

   • Turn Legend ON.

   • Adjust font size, style, and colour.

   • Choose position (right, left, top, bottom).

4. Go to Format your visual → Slices:

- Change individual slice colours for each designation if needed.

- Adjust default colour, transparency, and border.

5. Go to Format your visual → Data Labels:

   • Turn Data Labels ON.

   • Set Label content = Value + Percentage.

   • Adjust font size, colour, style, and display units.

   • Choose Label Style (e.g., callout, inside, outside end).

6. Go to Format your visual → Title:

   • Turn Title ON.

   • Enter the title: "Sum of Total Revenue by Designation".

   • Change font colour, size, style, and alignment.

7. Go to Format your visual → General:

   • Adjust height and width to fit your layout.

   • Add background colour, padding, or border if required.

8. Review & Save the final visualization.
